Builder is required to have a clear path, stub-out and customer water/sewer identified for service to be installed in the next 10 business days. If order is rejected, builder is responsible for call back to contact center and the 10-day install time period starts over.

* Separate entries for temporary and permanent electric service at same location.

** ESI ID is the Electric Service Identifier (Account Number) that is registered at ERCOT (ELECTRIC RELIABILITY COUNCIL OF TEXAS). This ESID can be faxed back, if requested, for the purpose of being able to provide this information to your Competitive Retailer when applying for service.
