Block & Index Load

Take control of your energy.

Our Block & Index plan is designed for large energy users, well-aware of how their company uses energy, and comfortable with participating in the energy market. Sound like you? This plan lets you to purchase and "stack" blocks of electricity to meet the load and risk profile of your business.

Our role is to help you implement the right mix. You can lock in any portion of your load based on the current price of natural gas, power, or heat rate. Plus, choose any combination of on-peak, off-peak, and 24/7 blocks of fixed pricing. Any consumption above or below the block will be charged or credited at the market-index price.

The end result—multiple options and greater customization of your energy plan.

BALANCED RISK

Capitalize on current market conditions with a blended strategy.

CUSTOMIZATION

With our help, choose the right mix of fixed and indexed pricing.

FLEXIBILITY

Allows you to shift power load to lower-priced times of use.
