

PERCENT FIXED  
AND INDEX ENERGY  
PLAN

## What it is

Percent Fixed & Index is a straightforward approach to balancing energy market risk. It provides you with the ability to take advantage of index market opportunities, while retaining the flexibility to lock in a stable, fixed price for up to 100% of your energy usage.

You control your exposure to index markets by purchasing fixed-price percentage blocks that follow your load shape. All remaining electricity is purchased at real-time index prices.

## Benefits at a glance

### CUSTOMIZATION

Purchase blocks at a fixed energy price to follow your load and stabilize your electricity bill.

### BALANCED RISK

Control your exposure to markets by locking in up to 100% of your rate.

### FLEXIBILITY

Retain the ability to capitalize on market opportunities.

### DEDICATED SUPPORT

Benefit from an assigned account representative and 24/7 support team.

### OPTIMIZE SPENDING

Customize a solution that enables you to spend where it matters most.

### CAUSES OF MARKET VOLATILITY:

- The growing presence of renewables and their intermittent nature
- Retirements of older power units create market scarcity conditions
- More frequent and extreme weather events and greater peaks in demands on the grid

---

### PERCENT FIXED & INDEX – KEEPING UP WITH THE EVER-CHANGING ENERGY MARKET:

- Balance market risks
- Benefit in times of lower prices
- Gain a measure of price stability is increasingly valuable as volatility continues to take hold

Customize your energy plan today.

## A flexible approach to balance energy market risk.

For added flexibility, you can designate each block as "on peak," "off peak," or "all period," and stack them as you choose. This approach lets you monitor the market, make timely purchases, and hedge against peak index prices in high-demand periods of extreme weather. Set them all at once or adjust over time.

### STACKED BLOCK FEATURES

- Define each block by calendar month
- Stack each block to comprise up to 100% of your monthly load
- Hold up to four blocks in any calendar month; minimum block size of 20%
- Decide to hold no blocks during a calendar month if you choose
- Buy blocks to hedge against peak index prices in high demand (extreme heat/cold) months

Stack percent blocks by calendar month

### ON/OFF PEAK BLOCK BENEFITS

- Designate your blocks as "on peak," "off peak" or "all period"
- Hold different kinds of blocks at the same time
- Stack your blocks as you choose

Stack "on peak," "off peak," or "all period" blocks by day

## Online Account Management

This tool comes with every energy plan we offer. It provides you with an intuitive online portal to easily manage your electricity.

### CONVENIENT

Pay bills on the spot

Download invoices

Manage access by account user

Add and delete site locations

### PERSONALIZED

Create custom group sites

Configure your dashboard

Create customized reports

### INSIGHTFUL

View market trends, billing information and energy usage

Analyze data and export reports

Create comparison reports
