

RENEWABLE SELECT

What it is

Renewable Select is a new retail electricity option where solar energy is sourced from a specific NRG facility and embedded seamlessly into the product. The result is a simplified retail electric procurement solution for customers.

Benefits at a glance

SIMPLICITY

Renewable Select is a retail electricity product with a familiar structure, reducing the amount of time to execute and manage the contract. No additional staffing or physical infrastructure is necessary.

FLEXIBILITY

Renewable Select can be tailored to meet your needs. Terms can be as short as five years and volumes can be as low as desired. The percent of renewable energy can also be set to meet your goals.

BUDGET MITIGATION

Renewable Select is designed to provide options that simplify procuring renewable energy and its benefits.

COST-EFFECTIVENESS

Renewable Select is cost-competitive with the grid, requires no new infrastructure, making it one of the lowest true-cost renewable sources in the market.

THE RISE OF RENEWABLES

- New, utility-scale solar energy resources in Texas have become cost-competitive with grid power
- Buyers are contracting for clean solar energy to fix a portion of their operating costs
- Increased availability of renewable energy no longer requires on-site installation of solar panels, wind turbines, or other clean energy generators

Right plan. Right time. Right for business.

Declining renewable energy costs and increased traditional generation costs create a strategic window of opportunity for a competitively priced renewable solution. Renewable Select capitalizes on that window while adding an easy-to-implement aspect.
